- Math story problems, arrays, graphs
- Invitations, greeting cards, post cards, menus
- Record a field trip or activity
- Multi Grade groups and whole school theme projects
- Book club
- Design an invention
- Mapping
- Multi cultural activities

Teachers Say Kids Love DoodlePaint So Much They Are Willing To Skip Recess!

"My students are glued to the computer when using DoodlePaint, even to the point of wanting to stay and work on their projects through recess! They are fascinated with the options and features this program offers as they create their pictures. DoodlePaint provides each student an opportunity to do something unique within the context of the learning environment. The students are proud of their designs and eager to display and share their work. My students can learn new computer skills, exercise their creativity and focus on our curriculum unit all at the same time. DoodlePaint is motivating, hands-on, educational, individualized, accommodating for students with special needs, exciting to explore alone or with a partner - what more could a teacher ask for!"

- Ms. Lee, Grade 4 teacher, Fernwood School
